So my project is about a Lebanese restaurant that offers authentic Lebanese food and has the option of ordering online and has a various menu.

functional requirements:

Homepage:

- Displays the restaurants name and the logo.
- Nav bar to help costumers find different pages such as the about us or like the menu page.

Menu:

- The menu will have different sections for each category.
- there will be images and prices for each meal.
- the costumers can scroll around and search for the meals they want.

Online Ordering:

- costumers can order online through or website
- we have a cart that you can add and remove items from it.
- you can add toppings for each dish or special sauces.
